## Meta Energy Powering Your Everyday Needs

# Who We Are

Meta Energy is a highly innovative private syndicate group with an outlook to empower individuals to build and foster a sustainable economy. We are inspired by innovative renewable energy technologies that seek to actively breakup the well-established status quo of fossil fuels. As believers in the four pillars of sustainability we have witnessed the ongoing transformation of the demanding electricity sector by renewable energy technologies which has inspired our involvement to contribute towards a sustainable economy.

We began in 2017 in the larger commercial and industrial installation scene and were involved in the due diligence and construction of largescale solar and battery farms in Australia, Mongolia, Nepal, Spain and the Middle-East. This wide range and exposure coupled with the team's diverse expertise reinforces our ideology for the need of a sustainable economy. Together with you we are equipped to deliver this vision.

As a client of Meta Energy you will enjoy our favourable domestic and international associations with leading solar and highly anticipated domestic battery suppliers. As Australians we believe in supporting our local manufacturing and in doing so support our independent sovereignty in the Pacific region. You will receive updates as our clients of our efforts in supporting our independence and bringing manufacturing back to our shores.

### Your Future Bill with a Solar PV System

# Packages For You

## Silver Package

Traditional Chinese Tier-1 (CT1) String Inverter System Package. Highly competitive rates, a great choice for the short-term investor.

## Premium Package

Traditional String Inverter with Sunpower panels, a highly innovative US-Singapore based Solar PV manufacturer. Competitive Rates with higher generation than a CT1 system. A great choice for a client seeking for more value with the strongest product panel warranty on the marketplace.

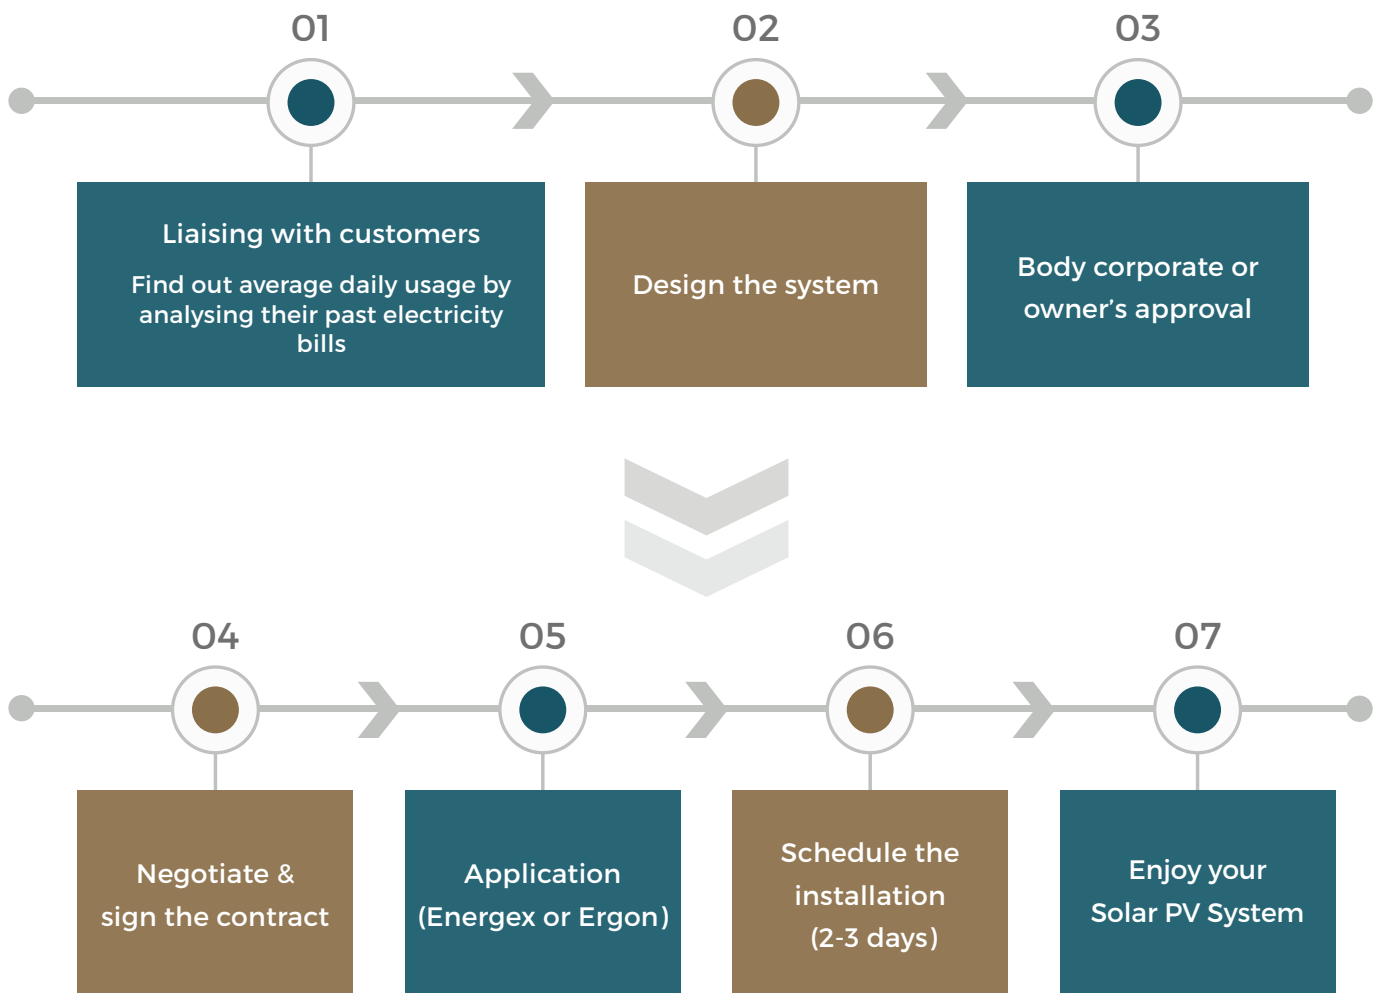

## Premier Package

Highly innovative US-Singaporean based micro-inverter and solar panel technology. For the well-established home-owner seeking higher value with the strongest solar panel and inverter product warranties.

## God Tier

The very best micro-inverter and panel technology on the marketplace. The highest performance and greatest value for any home owner. For the discerning client seeking longest term value.

## How Do We Get Started ?

1. Provide us with your last 3 or 4 energy bills.
2. Your property address.
3. Leave the rest to us.

**Our professional team will provide a free quote for solar system with no further obligations.**
